To Whom It May Concern:

LETTER OF REFERENCE: NBM

ALSTOM have been contracted by Eskom to refurbish all their generators units at the Hydro Electric Power Station in Gariep. During this period Alstom had acquired the services of NBM to supply Coded welders, Pipe Fitters and sourcing local unskilled labour to assist Alstom on this project. NBM also supplied all tools including welding equipment and consumables. Over the past 14 months ALSTOM has developed a strong relationship both personally and professionally with NBM based on their integrity, quality and willingness to resolve problems and professionalism.

NBM have always responded quickly to our enquiries and have always gone out of their way to meet the demands and requests for ALSTOM. The quality and value of their service has truly been exceptional on this project.

I would not hesitate to recommend the services of NBM to organizations looking to appoint NBM as their preferred Service Provider.

Yours Sincerely,

Adnaan Rawat
Project Manager
